

Robert L. Stuart
Full Stack Software Developer

Residence: Brentwood, TN 37027
Home: (615) 373-6874
Mobile: (615) 496-1551
Email: stuartrl@comcast.net

Objective

I am seeking a position to perform programmer/analyst duties where opportunities for personal and economic growth exists. Close proximity to home address is very desirable. It is important for me to be in an environment where open and honest interactions are encouraged. Equally important is setting realistic goals and dates for milestones and productivity measures. Proper tools and equipment for performing duties must be provided. Schedule flexibility and capability to occasionally work from home is highly desired. For now, my preference is to work with as many open source solutions as possible.

SKILLS

Languages

Java 8	HTML	JavaScript (AJAX)	JSP/JSF
XML	EJB	Unix	Spring

*Averitt Express, Contractor
Cookeville TN*

March 2011 to August 2011

Completed development of Google Maps project to locate and identify trucks in the Averitt fleet of trucks on the map. Program provide driver name, truck number, and load information on mouse over. Written in prototype and unit tested using Jasmine, built and deployed using maven. . Maintained existing legacy system; JSF, Hibernate, WebSphere, AS400

Senior Java Developer

*Franklin American Mortgage Co.
Franklin TN*

September 2009 to January 2011

Develop web services to interact with business partners. Participate as code contributor and build duties for weekly release schedule. Maintain multiple systems using a combination of open source and proprietary technologies such as struts2, Ajax, bamboo, maven, cvs, subversion, SQL server, RESTful, JMS, JBoss, javascript, css, AOP. We are currently in the process of refactoring heterogenous systems into Enterprise Service Bus (ESB). Successfully developed the primary image delivery system to receive images from external and internal sources and process into document repository.

Java Developer

*Affiliated Computer Services Inc. (ACS)
Govt Healthcare Services Division
Franklin TN*

August 2005 to September 2009

Enterprise – Developed letter templates using EMC products; xPression, xDesign, xAdmin. The letters cross several lines of business and must read current data from Oracle 10g database. Develop on demand and batch capabilities for letter production. Architect archiving and CC solutions for the system. This tool uses an application server for request responses. The current configuration uses Websphere application server. Duties include administrative configuration as well as development for multiple client contracts.

FLHK – Develop and improve new application to determine eligibility for State of Florida family healthcare programs. The system uses various combinations of Spring, Struts, AJAX, Oracle, Unix, Ant, WebSphere, CVS, cruiseControl, Informatics and test driven Agile development methodology to meet a very demanding release schedule. Use of Hibernate is planned for future iteration. Work closely with analyst group to clarify and realize use cases, ensuring application behavior meets client expectations.

MEDS - Maintain systems that in support of company's healthcare services division. Most recent assignment is Medicaid eligibility for State of Mississippi. Agile development is used to facilitate fast-paced changes to mission critical systems needed to match our clients' changing business requirements. The following base technologies apply: WebSphere, Oracle, CVS, Unix, Ant, Java, EJB, Struts, Vi, along with other various open source and license software.

Java Developer

*Franklin American Mortgage Co.
Franklin TN*

June 2004 to July 2005

Maintained legacy systems in support of company's business initiatives. Systems built primarily on open source products. Used Eclipse, Ant, Java, Putty, Vi, and SQL Server for database. Used CVS for code repository. Also used PostGreSQL and MySql, minimally.
